SUMMARY

Driven IT professional with expertise in system administration, software development, and strong analytical problem-solving skills. Proficient across Linux/Windows environments, AWS cloud solutions, and database management (MySQL, NoSQL). Combines technical execution with real-world negotiation and communication experience gained in debt collection, sales, and administration. Proven ability to serve as 2nd/3rd line support escalation point, ensuring system stability, root cause resolution, and infrastructure reliability. Adaptable, detail-oriented, and committed to delivering dependable, high-impact IT solutions that drive business continuity.
